

Multi-User Collaboration for the AEC Industry

Turn your model into a shared experience

ReVision by Reification.io, is a software service that takes your 3D content and creates immersive multi-user experiences. This allows designers to communicate broadly by bringing down barriers to entry and allowing your diverse set of stakeholders to become involved early in the process.

1

REMOTE HOSTING

Let us set up servers to host and manage your design process in a way that is accessible to all.

2

ENTERPRISE SUPPORT

Want more control? Host your models on your own servers, or run peer-to-peer.

3

SYSTEM DEPLOYMENT

Need help getting set up? We can also deploy systems, and train teams.

Immersive

Have your next review meeting onsite – virtually

Collaborative

Real-time multi-user access from desktops or VR headsets

Secure

Featuring full encryption and smart contracts

Our Service

Whether you want to work remotely, or together in your office, Reification can help

We import CAD models from any system capable of exporting to FBX — including Revit, Rhino, SketchUp, Fusion360, etc.

We can include surrounding terrain from satellite imagery, aerial scans, drones, or other height map data. Don't have that data? Through our partners we have you covered.

Do you need additional interactive content in your scene? No problem.

If you are new to VR/AR/XR, let us support you in deploying the right hardware systems for your team. Let's make sure you are not only on the cutting edge, but working with your system — not on it.

“This is amazing. It’s more than helpful, it’s eye opening”

– Ana Mayorova, client of Studio 12

Remote servers are accessible on a per user per month basis.

Accounts come with data plans to accommodate your project requirements.

Want to invite a visitor in, but they won't need a full month? Guest passes are also available.

CONTACT US TO FIND THE RIGHT SOLUTION FOR YOUR TEAM

Whether you need a large scale enterprise deployment on your private network, or a cloud based approach for your distributed team, Reification.io will work with you to find the right solution to unlock new levels of immersive collaboration.
