SUPPORTED SYSTEMS & TECHNICAL SPECIFICATIONS

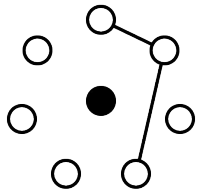

Joining through Virtual Reality (VR)

The ReVision service is compatible with VR Headsets using Oculus or SteamVR frameworks for Windows 10.

For the best experience, we recommend:

- Valve Index
- HTC Vive models
- PiMax models
- Oculus Rift
- Windows Mixed Reality models (via Windows Mixed Reality for SteamVR)

Please note: Stand-alone Virtual Reality Headsets (e.g. Oculus Quest) are NOT supported

SUPPORTED SYSTEMS & TECHNICAL SPECIFICATIONS

Joining through a Desktop / Laptop (Desktop mode)

Desktop mode use is supported for Windows 10 and MacOS.

When using ReVision in desktop mode – *for both Windows and MacOS* – headphones and a two-button mouse with scroll wheel are required. Mac trackpad currently not supported.

Minimum system requirements vary with model complexity.

The following system specifications are recommended, but not required:

- Reliable internet connection with at least 25 MB/s download and 3 MB/s upload
- A GPU at least equivalent to an NVidia 1060 series with 4GB VRAM
- A CPU at least equivalent to a Intel 4-core i7 with 16GB of RAM
- 500 MB space for the ReVision application
